

Wayne Pulver, DDS

Dr. Wayne Pulver received his Certificate in Endodontics from the Harvard School of Medicine in 1976. He received his DDS degree in 1973 from the University of Toronto and thereafter interned at the Beth Israel Hospital in Boston from 1973 to 1974. He maintains a private endodontic practice in Toronto, Ontario.

Dr. Pulver is the head of the endodontic section of Mt. Sinai Hospital, Toronto, a position he has held since 1978. He has served as Past President of the Ontario Society of Endodontists, Canadian Academy of Endodontists, George Hare Endodontic Study Club as well as the Ontario Dental Association.

He has received numerous awards including the University of Toronto Dental Student Society Award, the Endodontic Research Memorial Award of the American Association of Endodontists, Alumni of Distinction Faculty of Dentistry University of Toronto, Ontario Dental Association Service Award and the Distinguished Service Award of the Canadian Dental Association.

Dr. Pulver has lectured extensively and authored numerous clinical and scientific articles in endodontics and is a certified lecturer and member of the Real World Endo Board of Advisors.

**Real World Endo® presents
The Endo-Restorative Continuum**

Description: Full-Day Presentation (Lecture and Hands-On)

The lecture segment of this presentation will concentrate on two areas. 1) How to perform Endodontics in a predictable, reproducible manner, and 2) How to do root canal therapy in such a manner that you actually enhance the long-term prognosis of the tooth. The goal of this program is to have dentists learn how to perform endodontics in such a way that they can offer their patients a long-term natural dentition option as an alternative to implants.

Included in the lecture component will be a thorough discussion concerning access, non-surgical ultrasonic use, rotary file design, instrumentation techniques and various obturation options. Particular emphasis will be placed on developing endodontic synchronicity between a machined preparation and a laser verified primary or mono-cone. Additionally, a new post technique will be discussed that will facilitate the restoration of the endodontically treated tooth. Participants will have the opportunity to validate all these concepts during the hands-on session.

The hands-on session provides the participants the opportunity to use "Precision-Based" techniques to "machine a preparation" and obturate canals utilizing the latest Real World Endo technology. You will experience how the latest advances in material science have changed endodontics. Also, time will be dedicated to "Preventing the Separation of Rotary Files" and your learning practical and efficient techniques. Digital radiography and the use of ultrasonics will also be available to course participants. We will deliver "Just the Facts . . . Nothing but the Facts."

OUR VISION

For over half of a century, LHM Dental Studios has brought the best quality materials and craftsmanship to the dental industry. Thousands of successful restorations have given thousands of patients a beautiful smile.

Doctors in Canada and the US look to LHM for the best that dental technology has to offer. We have created a dynamic team dedicated to the latest technology, the highest quality dental restorations and a responsiveness to client needs unsurpassed in the industry. We are proud to be a part of the teamwork that goes into achieving results that are more functional and aesthetically appealing than ever before.

We at LHM dental Studios look forward to many more years of working together to meet your needs and exceed your expectations.

“Real World Endo® *presents:*

The Endo-Restorative Continuum.”

Dr. WAYNE PULVER

D.D.S. Cert Endo

January 14th, 2011

Registration :8:30

Lecture: 9:00 - 4:00

LHM Dental Studios

Educational center

344 Dupont St.

Toronto, ON

**During this lecture/hands-on
participants will learn:**

1. How to create straight-line access that will expedite the endodontic process.
2. Discover how endodontics can be precision-based.
3. The importance of preserving coronal radicular dentin.
4. How to "machine" or "mill" an endodontic preparation.
5. The benefits of developing "endodontic synchronicity" between a machined preparation and a master cone.
6. The multiple advantages of performing a constant .04 taper preparation.
7. A new bioceramic one-cone obturation technique.
8. How best to restore an endodontically treated tooth.
9. The multiple benefits of piezo electric ultrasonics.
10. Most importantly of all, how to perform endodontics in such a manner that you do not compromise the long-term retention of the tooth. In fact, learn how to do endodontics so that you actually enhance the long-term retention of the tooth.

For the ultimate Real World Experience, attendees are encouraged to bring two to four accessed, extracted teeth.
